PROFESSIONAL EXPERIENCE

Full-Stack Engineer 66degrees Contract Remote	Aug 2026 - Present
• Work across full-stack engineering with a focus on Flutter and mobile product development.	
Senior Flutter Engineer Arc.dev Freelance Remote	Mar 2026 - Aug 2026
• Rebuilt a buggy, poorly optimized FlutterFlow app from scratch in native Flutter, redesigning the UI/UX and introducing clean modular architecture to improve performance and stability. • Built a shared Flutter web and in-app admin console for managing events, teams, sub-teams, sponsors, charities, and organizers with role-based access and event-specific permissions. • Built Miles, an in-app AI help assistant using product guidance and event FAQs. Participants can type a question or record a voice question that is transcribed before Miles replies in text. • Implemented and validated row-level security across all 14 production database tables, with scoped participant access and admin permissions. • Delivered Apple Health and Health Connect activity sync alongside onboarding, team rankings, and challenge progress. • Built event-scoped leaderboards for teams, sub-teams, and participants using production activity data, with search, filtering, and sorting. • Built the Community feed for event-scoped posts, photos, likes, comments, reporting, and admin moderation.	
Co-founder & Senior Flutter Engineer blu studios Self-employed Hybrid	Mar 2019 - Mar 2026
• Led end-to-end development of mobile games and applications, from concept through live operations, owning technical architecture and product decisions. • Developed and maintained products with 12M+ downloads worldwide, including titles with 5M+ downloads and Google Play award recognition. • Built Flutter products from scratch with scalable architectures focused on maintainability, performance, and production stability. • Reduced ANR rates from about 30% to below 2% and improved frame rendering stability on low-end Android devices. • Resolved crashes, ANRs, memory leaks, and low-end device performance issues in live products, improving retention, monetization, and store ratings. • Reduced APK size by 45% through asset restructuring, rendering optimizations, and build configuration improvements. • Improved D1 retention from about 25% to about 40% through UX performance tuning and data-driven iteration. • Served as a technical reference, partnered with product and design teams, and co-led remote teams of up to 14 people.	

PREVIOUS EXPERIENCE

Desktop Developer VX Case Full-time Salvador, Bahia, Brazil · On-site	Feb 2018 - Mar 2019
• Developed a desktop application with a focus on UI implementation using TypeScript, Angular, and VTEX. • Implemented and maintained UI components from design requirements, ensuring usability and consistency. • Collaborated with senior developers to integrate frontend features with existing systems and backend services. • Gained experience with desktop application workflows and team-based software development.	
IT Support TECALL CONSULTORIA E SISTEMAS LTDA Internship Greater Salvador	Aug 2016 - Jan 2018
• Provided technical support and infrastructure troubleshooting for corporate clients. • Assisted in system maintenance and hardware configuration. • Gained foundational experience in networking, system administration, and customer support.	

SELECTED PROJECTS

Movement Challenge App Rebuilt a movement challenge platform in Flutter with health-data sync, event rankings, a Community feed, role-based admin tools, and an in-app AI help assistant.
Magic Sort Google Play Indie Games Accelerator 2024 winner; shipped high-performance Flutter gameplay and live-ops systems.
Rabit Google Play Best of 2021 selection and 5M+ downloads; built habit-tracking, cloud sync, and retention features.
Capy Flutter self-care app combining a virtual pet, habit tracking, mood journaling, and AI-powered conversations.

SKILLS

Engineering Flutter, Dart, mobile and web development, TypeScript, Angular, modular architecture, state management, testing
Data & AI Firebase, Firestore, Supabase, REST APIs, row-level security, OpenAI APIs, voice-enabled AI experiences
Production Performance optimization, analytics, CI/CD, release workflows, technical leadership, remote team collaboration

EDUCATION

Bachelor's Degree, Software Engineering Universidade Católica do Salvador Salvador, Brazil	2017 - 2019
Technical Course, Computer Networks SENAI CIMATEC Salvador, Brazil	2017 - 2018
Certificate in English Language, English Language Alternative Language Learning (ALL) Salvador, Brazil	2013 - 2016
